EuroCucina, 21–26 April 2026

Häcker unveils exclusive kitchen designs in Milan, defined by harmonious aesthetics

Rödinghausen. From 21 to 26 April 2026, Häcker will welcome visitors to EuroCucina at Hall 4, Stand C11–D16, presenting a curated selection of premium kitchen compositions across 460 square metres. Showcasing the systemat and concept130 product lines, the designs bring form, colour and material into a harmonious dialogue – fully reflecting the guiding principle, “the Art of Harmony.”

An exciting interplay of shapes, colours and materials

This year at EuroCucina, Häcker is demonstrating to the international trade audience that harmony can arise not only from the combination of similar elements, but also from an exciting interplay of different combinations of shapes, colours and materials. A ceiling canopy of gently flowing fabric waves, for instance, is perfectly complemented by softly contoured formed gable ends in high-quality wood veneer. These soft, dynamic forms are set against a contrasting backdrop in the diamond-patterned woven structure of the stand façade, which in turn echoes material textures such as the Viennese cane weave featured on the handleless systemat front AV 6085-GL. Glass and metallic elements, along with natural stone, further enrich the material palette, creating a space in which variety and harmony merge seamlessly.

The aesthetics of authenticity

At EuroCucina, Häcker demonstrates the design potential of authentic materials through three systemat kitchen concepts. The handleless wood veneer front AV 6023-GL in elegant walnut stands out through its finely grooved texture, which is particularly effective when paired with the brushed wood veneer front AV 6088. A defining design feature is the rounded formed gable ends in wood veneer and grooved wood veneer: they create harmonious transitions, emphasise material authenticity, and lend the overall concept a sense of architectural calm.

A generous systemat kitchen concept in the shade elegant oak echoes the look of Viennese cane weaving with the AV 6085-GL front, placing it in an engaging dialogue with the contemporary 10 mm frame design of AV 6065.

Carefully crafted solid-wood pull-outs and bronze-toned handles underline the kitchen's authentic elegance, while its inviting timber aesthetic is carried consistently into the interior cabinetry, featuring the design carcass in natural fine oak.

A striking contrast is introduced by the AV 7030 stone veneer kitchen in the shade black star: it combines the refined haptic qualities of genuine stone with delicately shimmering polymer glass in metallic carbon (AV 5015), and impresses with high-

quality features such as laterally sliding pocket doors and elegant black chrome accents inside the larder cupboards.

Harmonious colour schemes

At the trade fair stand, soft shades from the sand-beige colour spectrum meet oak and walnut hues, complemented by other nature-inspired shades such as sand grey (AURA), truffle brown oak (BALI) and emerald green (PORTO Selection-GL). Trend-conscious colour highlights – from vibrant blue tones at the reception and bar areas to the cosy orange-red of the lounge, and on to an elegant sideboard in bronze metallic lacquer – add distinctive accents and illustrate just how versatile the concept of harmony can be.

Transparent highlights & technical innovations

At EuroCucina, Häcker demonstrates how glass elements, with their transparent brilliance, further enhance the perceived value of kitchen designs, exemplified by sophisticated pull-out and cabinet solutions. The glass version of the filigree SLD pull-out system adds a sense of lightness to the AV 7030 black star stone veneer kitchen, further elevating the high-end character of the design. In the dressing room, the floor-to-ceiling cabinet wall in a finely coordinated NCS shade is complemented by a display case tall unit, forming a striking counterpoint to the closed surfaces while combining transparent elegance with functional precision.

Convenient fitting solutions for greater comfort

By advancing its technical solutions, Häcker elevates the comfort expectations of contemporary kitchens. An improved swivel fitting for kitchen appliances enables mixers or multifunctional cooking devices to be swung out smoothly and conveniently – space-saving, intuitive and perfectly integrated into daily kitchen use. The fittings range is expanded by a concealed hinge used exclusively on glass cabinets with metal-framed doors. Subtly embedded in the cabinet's transparent design, it maintains the clean, minimalist aesthetic without visual intrusion. At the same time, it offers high stability and precise functionality. In this way, technology is purposefully employed as a comfort-enhancing element, underscoring Häcker's commitment to high-quality kitchen solutions in which functionality and design harmony are perfectly aligned.

Images of our trade fair stand will be made available upon request after the start of the exhibition.

Häcker—The Company

Häcker was founded in 1898 as a cabinetmaker by Hermann Häcker and taken over by his son Friedrich in 1938. In 1965, the foundation for today's economic success was laid by the latter's son-in-law Horst Finkemeier and wife Renate through the serial production of kitchen furniture.

As an owner-managed family business, Häcker today produces fitted kitchens at five production facilities across two sites in Rödinghausen and Venne. The company offers its retail partners and employees a unique, values-driven corporate culture—reliable, responsible and exemplary.

With its product lines concept130 and systemat, as well as the brands BLAUPUNKT and h|tech for built-in kitchen appliances, Häcker offers a comprehensive product portfolio tailored to a wide range of customers and markets—from value-driven to premium.

More information about Häcker can be found on our website at haecker-kuechen.com/en and on LinkedIn (Häcker Kitchen International).
